ABOUT

Friendly,Motivated and passionate web developer with 3 years of experience in full-stack development. Proficient in front-end development with React and back-end development using Ruby on Rails and other techs. Thrilled to embrace new challenges and continuously expand my skills to stay at the forefront of technology.

EXPERIENCE

IT Support Specialist   MegaPlus - 2020/2021   ⊙ On Site

- gaining strong problem-solving skills and technical expertise.
- Gain experience in managing and configuring operating systems (Windows, macOS, Linux), user accounts, and permissions
- Learn how to use remote desktop and support tools to assist users from different locations.
- Gain experience in installing, configuring, and troubleshooting common software applications.

Front-end Developer   B2C - 2021/2022   ⊙ On Site / Remote

- Master structuring web pages with HTML and styling them using CSS, including concepts like Flexbox, Grid, and responsive design.
- Learn tools like SASS/SCSS for more efficient and organized styling.
- Understand how to manage complex application state using tools like Redux or Context API in React.
- Understand how to create web layouts that adapt to various screen sizes using media queries and mobile-first design principles.

Back-end Developer   Vabaco - 2023/2024   ⊙ On Site / Remote

- Master the Model-View-Controller design pattern, organizing application logic effectively.
- Build and consume RESTful APIs, including concepts like routing, controllers, and serialization.
- Learn SQL and how to interact with databases like PostgreSQL and MySQL.
- Use testing tools like RSpec for test-driven development (TDD)
- Implement user authentication and role-based authorization using Devise, JWT, or similar gems.
- Gain experience with background processing using Sidekiq, Delayed Job.
